

AWS SNS Notification System

1. Sign in to the AWS Management Console and open **SNS** (Simple Notification Service).
2. Go to **Topics** → **Create topic**.
3. Choose topic type (**Standard** or **FIFO**) (we use Standard).
4. Enter a **Name** (Class-rule).
5. Click **Create topic**.

The screenshot shows the 'Create topic' page in the AWS Management Console. The page has a blue header with the text 'New feature! Amazon SNS now supports High Throughput FIFO topics. Learn more'. Below the header, the 'Create topic' section is visible. It includes a 'Details' section with a 'Type' dropdown set to 'Standard' (with a list of features like 'Best effort message ordering', 'At least once message delivery', 'Amazon-managed SQS, Lambda, Data Pipeline, HTTP, SMS, email, Amazon EventBridge'). There is a 'Name' field with a 'Class-rule' placeholder and a 'Display name' field. Below these are several optional sections: 'Encryption', 'Access policy', 'Data protection policy', 'Delivery policy (HTTP/S)', 'Delivery status logging', 'Tags', and 'Active tracing'. At the bottom right, there are 'Cancel' and 'Create topic' buttons.

6. Copy or note the **Topic ARN** shown after creation.
7. Create subscriptions: open the topic → **Create subscription** → choose **Protocol** (Email, SMS, AWS Lambda, SQS, HTTP/S, etc.) → enter **Endpoint** → **Create subscription**.

The screenshot shows the AWS Management Console interface for creating a new subscription. At the top, there's a navigation bar with the AWS logo, a search bar, and user information. Below the navigation bar, the breadcrumb trail reads 'Amazon SNS > Subscriptions > Create subscription'. A blue banner at the top of the main content area says 'New Feature: Amazon SNS now supports High Throughput FIFO topics. Learn more'. The main section is titled 'Create subscription' and contains several fields: 'Topic ARN' (with a dropdown menu showing 'arn:aws:sns:ap-south-1:678025036602:Class-rule'), 'Protocol' (a dropdown menu set to 'Email'), and 'Endpoint' (a text field containing 'shakhateeb0202@gmail.com'). Below these fields, there's a note: 'After your subscription is created, you must confirm it. Info'. Further down, there are two optional sections: 'Subscription filter policy - optional' and 'Redrive policy (dead-letter queue) - optional'. At the bottom right of the form, there are 'Cancel' and 'Create subscription' buttons.

8. For Email subscriptions: confirm the subscription via the confirmation email link.

Simple Notification Service

Subscription confirmed!

You have successfully subscribed.

Your subscription's id is:

arn:aws:sns:ap-south-1:678025036602:Class-rule:d77aea3f-fc65-4e14-827f-4dd44650f390

If it was not your intention to subscribe, [click here to unsubscribe](#).

9. Publish a test message: open the topic → **Publish message** → enter Subject and Message → **Publish**.
